 Studio Argus Ltd

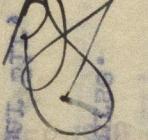

I have to confess I was very surprised when we were invited to come down to see the new studio. It is a large room with a high ceiling and a large window overlooking the city. The room is filled with light and has a modern feel. There is a large desk in the center of the room, and a comfortable sofa and armchair. There is also a small table with some refreshments.

The studio is well equipped with everything you could possibly need. There is a large camera on a tripod, a lighting kit, and a sound system. There is also a computer and a monitor, and a large projector screen. The room is spacious and airy, and there is plenty of room to move around.

The studio is located in the heart of the city, and it is easy to get to by bus or taxi. There is a good selection of restaurants and bars nearby, and it is a great place to relax after a long day of work. The studio is well worth the visit, and I highly recommend it to anyone looking for a professional photo studio.
