

MESSRS. ORESUNDSVARVET'S S.S. MOS. 5 & 20.

A letter has been received from the Malmo Surveyors stating that the Builders desire to use some old anchors at present in their Works for the stream and kedge anchors required by the Rules for the above vessels.

The weights of the individual anchors vary somewhat from the Rule Requirements, but the aggregate weights proposed in each instance are equivalent thereto.

The weights of the anchors are submitted for the favourable consideration of the Committee, but it is considered the Surveyors should be informed that before these anchors can be used in classed vessels, they will have to satisfy themselves as to the condition of the same, and also to see that they have been tested at a Proving House to the requirements of the Society's Rules.
