

Kurumi

Liv. 112663

In the Liv. report it is stated that one machine has been opened out and examined. The vessel has two machines and both of these were opened out & examined in November last. As seven months have elapsed since then, both of these machines should have been examined at this time together with their auxiliaries.

In a telephone conversation with the Owners it is stated that the vessel is proceeding to Apr., Gt. & Liv., finally sailing on 1<sup>st</sup> July; and they have been requested to arrange to have the other machine examined before then.

It is submitted this request be confirmed, and the Liv. Surveyors informed that the survey is not complete.
