F. & S.

We thank you for your two letters of 18th inst.

"HANNAH" The decision of your Committee to postpone the renewal of the screw shaft liner meantime is appreciated, and we note that this should be done before the end of the current year.

"MEGGIE" We were under the impression that the donkey boiler survey had been completed and will see that the valves are floated at the first opportunity.

Similarly with regard to the loadline survey, we will also have this attended to when we have the chance.

We would mention that a general examination of this ship was made by your surveyor while at Barry recently.

Yours faithfully,  
W. TULLEY & CO. LTD.,

*J. Smothery*  
Secretary.
