

BOARD REPORT on the s.s. "HARBLEDOWN".

It is submitted the Freeboards given on the accompanying form, being those required by the Tables, merit approval.

With regard to the timber freeboards, the Builders and Surveyors should be informed that the attachment of the eyeplates to the stringer plate in the wells instead of the sheerstrake as required by Statutory Rules & Orders No.96, Rule 91, can be approved in this case in view of the thickness of the stringer plate, provided they are secured to the Surveyor's satisfaction. Additional eyeplates should be provided in order to comply with the above Rule, and the spacing of the sockets should comply with the requirements of Standing Rules & Orders No.110, Rules 9 and 13.
