

BOARD REPORT on the

Harport

It is submitted the Hull Surveyors be advised that it is noted from their letter that the above vessel's survey for reclassification will be completed at Istanbul. The ~~full~~ <sup>full</sup> ~~survey~~ <sup>survey</sup> ~~fullboard~~ <sup>fullboard</sup> certificate will not be issued until this survey has been completed. But a ~~provisional~~ <sup>provisional</sup> short-term fullboard certificate will be issued by this Office to enable the vessel to proceed to Istanbul. The Surveyors should therefore state at what date the vessel is expected to arrive at Istanbul, in order that the period of validity of the ~~provisional~~ <sup>provisional</sup> certificate may be determined, and to state whether the vessel is proceeding in the load or ballast condition. In the latter case they should state the mean load draught (approximate) corresponding to the ballast condition in order that a fullboard for the voyage may be established.
