

Spes

Ex Herman

The Leith Surveyors should be requested to describe fully how the "steel plate bolted doors" ~~at~~ the bridge front are secured, whether by riveted hinges or only hook bolts in order that it may be seen under which class the closing appliances fall.)

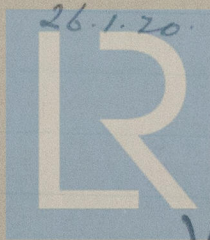

The Surveyor should also state whether there are 4 freeing ports on Each side in the well or if 4 is the number for both sides.

The height of bridge ~~to~~ omitted from report should be given.

It should be pointed out that the term "door" is only applicable to permanently hinged closing appliances.
