Reference

Dear Mr. Ruck-tiene

I am forwarding a first entry report on the machinery of the ex German steamer "Phos". The machinery is in good condition and although the shafting is not quite up to our requirements I think she can safely be worked at a working pressure of 180 lbs per sq. in.

The boiler is well stayed around bottom manhole door.

She is expected to indicate between 700 to 800 H.P. at between 90 to 100 R.P.M.

Thanking you for your kind attention & a reply at your earliest convenience

With kindest regards

Yours faithfully

A. T. Thomas
