

GLASGOW

10th February, 1915.

JOHN H. HECK

Messrs. Lindsay Burnet & Co., survey during construction two steel manoeuvring Air Reservoirs Nos. 5851 intended for the oil engined vessel Messrs. Harland & Wolff, Ltd. No. 465. The material has been tested by the Surveyors to this Society, the scantlings are in accordance with the rules for a working pressure of 294 lbs. per square inch and the workmanship is good. The reservoirs were tested in my presence on the 9th Feby. 1915 by hydraulic pressure to 588 lbs. per square inch, showed no signs of weakness and were found tight and sound at that pressure. The working pressure should not exceed two hundred and ninety fourpounds per square inch.

Stamp on Reservoirs:-
