

plating (p.s.) being dealt with at the Owners' convenience

"Fitted for oil fuel 6,40, F.P. above 150°F"

MR. POTTS

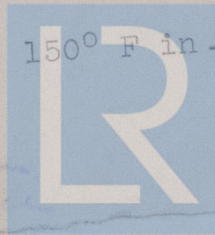

Suggested that unless the Owners desire otherwise the ordinary deep tank notation be used.  
If desired by the Owners vegetable oil notation might be given but not oil fuel having in view date of build.

Riveting of seams of Deep Tank mostly single.

Please state whether notation to be eventually assigned when tank tested may be

"Carrying cargo oil F.P. above 150°F in the Deep Tank"
