

Kpt. 13.

# REPORT ON ELECTRIC FITTINGS.

No. 81948.

(OTHER THAN FOR THE PROPULSION OF THE VESSEL)

-8 NOV 1927

Date of writing Report ..... 19 ..... When handed in at Local Office 5/11/27 Port of Newcastle-on-Tyne Received at London Office.....

No. in Survey held at Newcastle. Date, First Survey Aug. 16. Last Survey Sept. 21. 1927.  
Reg. Book. Supp. (Number of Visits.....2.)

39985 on the British Endeavour

Built at Newcastle. By whom built Armstrong Whitworth & Co. Card No. 1025 When built 1927  
Owners British Tanker Co. Ltd Port belonging to London

Electric Light Installation fitted by Armstrong Whitworth & Co. Ltd Contract No. 1025 When fitted 1927.

System of Distribution Waste wire ✓

Pressure of supply for Lighting 110 ✓ volts, Heating Power ✓ volts, Power Power ✓ volts.

Direct or Alternating Current, Lighting Direct ✓

If alternating current system, state frequency of periods per second.....

Has the Automatic Governor been tested and found efficient when the whole load is suddenly thrown on or off..... Yes

Generators, do they comply with the requirements regarding rating..... Yes, are they compound wound..... Yes

are they over compounded 5 per cent..... Yes, if not compound wound state distance between each generator.....

Where more than one generator is fitted are they arranged to run in parallel..... No, is an adjustable regulating resistance fitted in series with each shunt field..... Yes

Are all terminals accessible, clearly marked, and furnished with sockets..... Yes, are they so spaced or shielded that they cannot be accidentally earthed, short circuited, or touched..... Yes

Are the lubricating arrangements of the generators as per Rule..... Yes

Position of Generators On dynamo flat at after end of engine room

is the ventilation in way of the generators satisfactory..... Yes, are they clear of all inflammable material..... Yes

if situated near unprotected woodwork or other combustible material, state distance of same horizontally from or vertically above the generators.....

and..... are the generators protected from mechanical injury and damage from water, steam or oil..... Yes

are their axes of rotation fore and aft..... Yes

Earthing, are the bedplates and frames of the generating plant efficiently earthed..... Yes are the prime movers and their respective generators in metallic contact..... Yes

Main Switch Boards, where placed On dynamo flat at after end of engine room

If the generators and main switchboard are not placed in the same compartment, is each generator provided with a fuse on each insulated pole as near as possible to the terminals of the generator, additional to that provided on the main switchboard.....

Switchboards, are they placed in accessible positions, free from inflammable gases and acid fumes..... Yes

are they protected from mechanical injury and damage from water, steam or oil..... Yes, if situated near unprotected woodwork or other combustible material, state distance of same horizontally from or vertically above the switchboards.....

and..... are they constructed wholly of durable, non-ignitable non-absorbent materials..... Yes, is all insulation of high dielectric strength and of permanently high insulation resistance..... Yes

if semi-insulating material is used, are all conducting parts insulated from the slab with mica or micaite or other non-hygroscopic insulating material, and the slab similarly insulated from its framework..... Yes

and is the frame effectively earthed..... Yes Are the fittings as per Rule regarding:— spacing or shielding of live parts.....

Yes, accessibility of all parts..... Yes, absence of fuses on back of board..... Yes, proportion of omnibus bars..... Yes

individual fuses to voltmeter, pilot or earth lamp..... Yes, connections of switches..... Yes

Main Switchgear, description of switchgear for each generator and each outgoing circuit, and arrangement of equalizer switches Double pole switches

+ Double pole fuses on dynamo mains + on each outgoing circuit

Instruments on main switchboard one ammeters one voltmeters..... synchronising device for paralleling purposes.....

Earth Testing, state what means are provided at the main switchboard for indicating the state of the insulation of the system Earth lamps

coupled to earth through switches + fuses

Switches, Circuit Breakers and Fusible Cut-outs, do these comply with the requirements of the Rules..... Yes

Joint Boxes Section and Distribution Boards, is the construction, protection, insulation, material, and position of these as per rule..... Yes

W421-0149 1/2

Cables: Single, twin, concentric, or multicore *single twin* are the cables insulated and protected as per Tables IV or V of the Rules *Yes*

Fall of Pressure, state maximum between bus bars and any point of the installation under maximum load *3.9 volts*

Cable Sockets and other connections, are the ends of all cables having a sectional area of 0.04 square inch and above provided with soldering sockets *Yes*

Paper Insulated Cables. If cables are paper covered, is the dielectric at the exposed ends of the conductor protected from moisture by being suitably sealed with insulating compound

Cable Runs, are the cables fixed as far as possible in accessible positions not exposed to drip or accumulation of water or oil, or to high temperature from boilers, steam pipes, uptakes or other hot objects, or to avoidable risk of mechanical damage *Yes*

Support and Protection of Cables, state how the cables are supported and protected *head covered + armoured clipped up with galvanised iron clips along fore & aft gangway + in engine room. head cord in cabins*

If cables are run in wood casings, are the casings and caps secured by screws *Yes* are the cap screws of brass *Yes* are the cables run in separate grooves *Yes* If armoured and lead covered cables are secured by metal clips, are the clips spaced as per Table VIII *Yes*

Refrigerated Chambers, if lights are fitted, are the cables and fittings in accordance with the special requirements

Joints in Cables, state if any, and how made, insulated, and protected *none made*

Watertight Glands and Deck Tubes, are all cables passing through decks and watertight bulkheads provided with deck tube or watertight glands *Yes*

Bushes in Beams and Non-watertight Partitions, where armoured cables pass through beams and non-watertight partitions, are the holes efficiently bushed *Yes* state the material of which the bushes are made *lead*

Earthing Connections, state which earthing connections are fitted and their respective sectional areas *Yes*

Alternative Lighting, are the groups of lights in the proper machinery space arranged as per Rule *Yes*

Emergency Supply, state position and method of control of the emergency supply and how the generator is driven *none fitted*

Navigation Lamps, are these separately wired *Yes* controlled by separate switch and separate fuses *Yes* are the fuses double pole *Yes* are the switches and fuses grouped in a position accessible only to the officers on watch *Yes*

has each navigation lamp an automatic indicator as per Rule *Yes*

Secondary Batteries, are they constructed and fitted as per Rule

Fittings, are all fittings on weather decks, in storerooms and engine rooms and where exposed to drip or condensed moisture, watertight *Yes* are any fittings placed in spaces in which goods are liable to be stored in close proximity to them; if so, how are they protected

are any fittings placed in spaces where inflammable or explosive dust or gases are liable to be present, if so, how are they protected *gaslight guarded*

*pendants fitted in pump room roof.* how are the cables led *in gaslight pipe wholly outside the pump room.*

where are the controlling switches situated *in lobby to bridge space.*

Searchlight Lamps, No. of *Yes* whether fixed or portable *Yes* are their fittings as per Rule

Arc Lamps, other than searchlight lamps, No. of *Yes* are their live parts insulated from the frame or case *Yes* are their fittings as per Rule

Motors, are their working parts readily accessible *Yes* are the coils self-contained and readily removable for replacement *Yes* are the brushes, brush holders, terminals and lubricating arrangements as per Rule *Yes* are the motors placed in well-ventilated compartments in which inflammable gases cannot accumulate and clear of all inflammable material *Yes*

are they protected from mechanical injury and damage from water, steam or oil *Yes* are their axes of rotation fore and aft *Yes*

if situated near unprotected woodwork or other combustible material, are the motors of the totally enclosed, pipe ventilated forced draught, drip or flame proof type *Yes* if not of this type, state distance of the combustible material horizontally or vertically above the motors *Yes* and *Yes*

Control Gear and Resistances, are the generator field and motor speed regulators, starters and controllers constructed and fitted as per Rule *Yes*

Lightning Conductors, where lightning conductors are required, are these fitted as per Rule *Yes*

Ships carrying Oil having a Flash Point less than 150° F. Have the special requirements of the Rules been complied with regarding switches, joint boxes, section and distribution boards, protection of cables, method of distribution, lead of cables, lights and fittings *Yes*

If portable lamps for use in dangerous spaces are supplied, are they of a type approved by the Home Office *Yes*

All Conductors are of annealed copper conforming to British Standard Specification No. 7.  
 The Insulated Conductors are guaranteed to withstand the immersion and resistance tests specified in the Rules.  
 The foregoing is a correct description.

*Sir W. G. Armstrong Whitworth & Co. Ltd.* Electrical Engineers. Date *4/11/27.*

**COMPASSES.**

Distance between electric generators or motors and standard compass *244 feet*  
 Distance between electric generators or motors and steering compass *240 feet.*  
 The nearest cables to the compasses are as follows:—  
 A cable carrying *.25* Amperes *on the* feet from standard compass *8* feet from steering compass.  
 A cable carrying *.25* Amperes *8* feet from standard compass *on the* feet from steering compass.  
 A cable carrying *4.5* Amperes *11* feet from standard compass *8* feet from steering compass.  
 Have the compasses been adjusted with and without the electric installation at work at full power *Yes*  
 Has the effect of switching on and off circuits, motors and other electro-magnetic apparatus within the vicinity of the compasses been noted *Yes*  
 The maximum deviation due to electric currents was found to be *nil* degrees on *all* course in the case of the standard compass, and *nil* degrees on *all* course in the case of the steering compass.

**SIR W. G. ARMSTRONG, WHITWORTH & CO. LTD.**  
 ARMSTRONGS SHIPBUILDING MANAGERS LTD.
