

M.V. Orazio

As the two Donkey Boilers originally fitted  
on board this vessel (Ham. report No. 17044)  
were found to be unsuitable they were removed  
& replaced by two new boilers (Hamburg  
Cert Nos. 460 & 461). As the ~~four~~ donkey  
boilers mentioned in Ham. report No. 17044 have  
not yet been fitted in a classed vessel, the  
document <sup>with Genoa fitting or board report No. 10081 attached,</sup> has been dealt with as an  
"Unclassed" Boiler Report, & placed with the  
Hamburg reports.

The particulars of the two new  
boilers fitted in the above vessel will be  
found in Hamburg report No. 17847, attached  
to Genoa report No. 10234

In lr 28/13/28 recd 31/12/28 (E) Two of these  
boilers being fitted in Stat. Tel. Co.  
Nos 773/4

As boiler No 237 (Cert No. 443) has now  
been fitted on board S.S. Fusijama (Stab. Tec.  
Tristino Yara No 773) Ham report No. 17044  
has been attached to Tristino report No. 8341  
on that vessel. The index cards have been  
corrected accordingly.
