

24 APR 1933

GLASGOW REPORT No. 5 3 3 2 6

S.S. "MANGALORE"

Each tonnage opening in the after bulkhead of the bridge is closed both by a portable steel plate and also by storm boards in riveted channels. The Owners request that the portable steel plates be indicated on the freeboard certificate.

The majority of S.S. No. 3 has now been held. As, however, the ship is to be laid up, the Owners do not intend to dry dock for completion of the special survey until she is again commissioned. The Report No. 8 on the survey now held will be forwarded with the recommendation "S.S.Gls.No.3, 4-33" on completion of the survey.
