

P.S. Christianborg.

{ Rot. 12138.
Hwc. 74157.

It is submitted the Rotterdam Surveyors be informed that their report does not make it clear as to whether all the articles of spare gear as specified in the Rules are carried on board, but it is concluded the following articles have been supplied, namely:-

- 2 bolts (or studs) and nuts for each size of rotor bearing, main gear wheel bearing and pinion bearing.
- 1 set of coupling bolts of each size used.
- 20 of total number of bolts (or studs) and nuts for each gear case joint, and also for each turbine casing joint.
- Sufficient pads for one face of main thrust block.
- 1 set of feed pump valves.
- 1 " " bilge " "
- 1 " " lubricating oil " "
- 1 bucket & rod for lubricating oil pump.

The above should be confirmed, and the Surveyors should also be requested to state the hydraulic pressure to which the superheaters have been tested after fitting on board, as this information has been omitted from their report.
