ships the height of the R.O.D. is to be taken from the level of the top of the amidship beam.
In flush-decked vessels the total standard mean sheer means the sheer measured at the stem and stern-
post. In vessels having poops and forecastles, it means the sheer measured at points distant

line of keel or to the water line. If measured relatively to water line
survey and also the usual load draft forward and aft should be reported
In sheer as reported is measured
