Nº. 4220.

The remarks of the Chief Ship Surveyor are desired on this case for the consideration of the Classing Committee.

("The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement."—Extract from Sub-Committee's Report, 24/5/92.)

The class is subject to No.1 plate in sheerstrake port side, being renewed at Owners' convenience.

The St. John's N.F.L. Surveyor reports the vessel placed in dry dock and minor repairs effected after Nos.3 & 4 holds flooded for heavy weather.

Subsequent to dry docking the vessel was examined by a diver after grounding who reported slightly indented bottom plating forward and the Surveyor recommends the vessel be dry docked for examination on arrival in the U.K.

The Newport Surveyors report the vessel placed in dry dock, bottom coated and examined.

No.1 keel and Nos.1,2 & 3 plates in "A"strake (p & s) found indented and stem bar in way twisted.

Temporary repairs have been effected and the Surveyors recommend the indented keel and "A"strake plates <sup>(pos) etc</sup> be dealt with at the first available opportunity.

No.1 plate in sheerstrake as above, continues efficient,

It is submitted the vessel appears worthy to remain as classed with record of survey 12,39, subject as above and as recommended by the Newport Surveyors.
