† In vessels obtaining an allowance for deck erections under Para. 11 where the sheer drops abaft amidships the height of the R.Q.D. is to be taken from the level of the top of the amidship beam.
§ In flush-decked vessels the total standard mean sheer means the sheer measured at the stem and stern-post. In vessels having poops and forecastles it means the sheer measured at points distant

† The Surveyor should state whether the fall in sheer is line of keel or to the water line. If measured relative to the water line the surveyor should also state the normal lead draft forward and
