

Extract from letter from Mr. Chisholm,
dated 25th February, 1918.

*Received
18.3.18*

"With reference to your letter of January 9th regarding the case of the S.S. "MUNINDIES" ÷ I have taken up the matter of the tonnage measurement with the local Surveyor. Mr. Marsden. In his reply Mr. Marsden states that the tonnage measurement in the case of this vessel was taken in accordance with the latest practice approved by the American Authorities. This means that the additional ordinates at the lower part of the sections have been introduced just as would be the case if the vessel had been measured according to the British Rules."
