

MARSEILLES

November 27th 1920

J. ESQUERRE

Messrs L. SAVON & Co survey during manufacture the following
pieces of machinery stated to be intended for the main engine
of steamer "PODESTA"; (which is stated to be lying at
port Said under repairs) .

one low pressure cylinder with various parts .

one I.M.P. Cylinder with separate sleeve and cover

two cast iron columns .

These pieces of machinery were examined at various stages of manu-
facture, dimensions checked with plans submitted, cylinders
tested, and all found satisfactory .

For the purpose of identification the cylinders have been
stamped .
