

2 AUG 1932

Steam Trawler "CYMREA".

It is submitted the Hull Surveyors be informed that the remarks contained in their letter of the 29th ultimo respecting the propeller shaft of this vessel are noted, but that in the circumstances there will be no objection to the Board of Trade letter sent them on the 28th ultimo being handed to the Owners, without amendment.

For purposes of the vessel's classification, however, they should arrange for documentary evidence of the shaft having recently been seen by the BC Surveyors to be forwarded to this Office if possible.
