Dear Sirs,

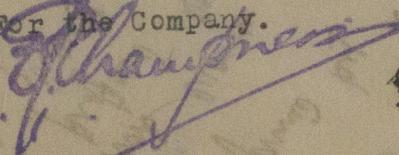

S.S. "Doric Star".

In connection with the fitting of new oil bunkers in No.6 Hold, we confirm telephone message to-day stating that height of overflow above crown of tank would be 35'-6".

The information given us points to the possibility of having to fit beams of excessive scantlings, As we would prefer to retain the size of beams submitted we would agree to fit intermediate girders giving a suitable span.

Yours faithfully,

For the Company.

J. L. S.
