LLOYD'S REGISTER  
RECEIVED  
30 OCT 1933

Dear Sirs,

S.S. "Doric Star" LONDON

✓ We have pleasure in submitting for your approval print in triplicate shewing our proposed arrangements for the carriage of oil in the spaces alongside Engine Room Boiler casings, also print shewing the arrangement of all oil fuel bunkers.

It is intended that the spaces alongside engine casing port and starboard, should form a common tank, the second deck being perforated. The upper tween decks alongside boiler casings only to be adapted for oil fuel, existing coal pockets below third deck will be entirely renewed suitable for the carriage of oil fuel. All tanks arranged to overflow to Double Bottom when 95% full and there will be no pipe connections between upper bunkers and pockets.

We trust you will give these arrangements your early consideration,

and are,

Yours faithfully,

For the Company.
