6th October, 1933.

Lloyds Register of Shipping,
71, Fenchurch Street,
LONDON, E.C. 3.

Dear Sirs,

S.S. "DORIC STAR".

With further reference to the question of increasing the equipment of this vessel consequent on the proposal to fill in the fore and after wells, we have inspected the vessels Anchor and Cable Certificate and find that she now carries 300 fathoms of 2-11/16" diameter cable, with collective weight of anchors 260 cwts.

As the equipment numeral given in the Register is $f\ddagger$ corresponding to 2-10/16" cable with collective weight of anchors 257½ cwts, it would appear that the existing equipment is already in excess of the rule requirements, consequently the increases due to the proposed alterations will be less than we at first thought probable.

Yours faithfully,
For the Company.
