Survey Due Starboard Screwshaft Survey due 9,31.

A Special Survey No.3 has been carried out on the hull of this vessel and partly held on the machinery.

The vessel will be eligible for the record of LMC 5,30 when the pumping arrangements, the fuel storage and daily service tanks have been examined, and a proposal to complete this inspection on her return from the whaling grounds in the Autumn was agreed to by the Committee in May last.

A proposal to carry out the survey of the starboard screwshaft during the Winter was agreed to in November last.

In reply to enquiry the Oslo Surveyors now state that the vessel is laid up and that the survey of the starboard screwshaft will be held before she is again placed in commission.
