

Motorship "GROSHOLM".

Plans of a new double bottom amidships and propeller brackets submitted by the Christiania Surveyors.

It is submitted the Surveyors be informed by wire as requested that the propeller brackets should be 8" x 4" supported by deep floors and horizontal connections at top and bottom to their satisfaction. The scantlings of the double bottom are approved ^{for oil fuel} subject to ceiling laid on grounds ^{with the scantlings submitted} being provided for use when ordinary cargo is carried. If ceiling is provided, the riveting of the edges of the tank top plating might be single riveted, but ^{alternatively} if ceiling is not provided the thickness of the tank top plating should be increased to .40" and all riveting should be double.
