3 Plans
26 APR 1938
LONDON

Reference

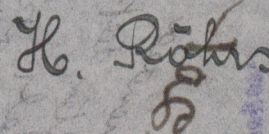

Dear Sir,

Reverting to your letter of the 24th January last returning approved plan of pumping arrangement in the machinery space for Messrs. Deutsche Werft's Yard Nos. 201 to 204 I have to state that at the request of the Owners it is intended to dispense with the bilge lines Nos. 405 and 713 from the after cofferdam at frames 53 and 54. For draining the cofferdam an ejector having a capacity of 30 tons/hour will be fitted in the cofferdam and for filling purposes a pipe connection of 100 mm internal diameter will be provided to the deck wash line.

Three copies of a sketch showing the proposed alteration are being submitted herewith for the approval of the Committee.

I am, Dear Sir,

Yours faithfully

H. Richter

The Secretary,

LONDON
