Lloyd's Register of Shipping,

3, Steinhoeft,

Hamburg, 14th May, 1938.

Reference

Dear Sir,

In connection with Messrs. Deutsche Werft's Yard Nos. 201-204 and 205 plans of La Mont Waste-Heat Donkey Boilers were approved on the 13th November and 14th January last for a working pressure of 12 kg per sq. cm. The Builders have now called attention to the fact, that the working pressure for these Boilers should be 12.7 kg per sq. cm. and not 12 kg per sq.cm. as previously proposed.

In the circumstances the approved plans for these Boilers are returned herewith and the Builders shall be glad, if the scantlings and arrangements as shown on the plans could now be approved for a working pressure of 12.7 kg per sq. cm. For Yard No. 201 the cylindrical Donkey Boilers have been tested for a working pressure of 180 lbs. in accordance with the plan approved on the 27th February 1936.

Two Certificates of tests (No. 692 and 693) are enclosed herewith for signature. The previously signed Certificates, giving a working pressure of 170 lbs., are returned herewith for cancellation.

I am, Dear Sir,

Yours faithfully,

The Secretary,
LONDON.
