

Messrs. Deutsche Werft's Nos.201/4.  
-----

Plan shewing amended connection of transverses to side longitudinal bulkheads submitted, in duplicate, by the Hamburg Surveyors.

Instead of the riveted attachment as shewn on the approved plans it is now proposed to weld the transverses to the centre line bulkhead.

It is submitted the Surveyors be informed that the scantlings and arrangements as shewn and amended will be approved provided they be carried out to their satisfaction, the electrodes comply with Clauses 1-7, Section 4 of the Rules for the Application of Electric Arc Welding to Ship Construction, and the consent of the Owners be obtained.
