

DETAIN

steamer "ATTIKOS".

It is submitted Greek Convention certificates be sent to the Cardiff Surveyors for issue when the Convention regulations are complied with and the freeboards are marked on the vessel's sides and the Official Number and International Distinctive Letters inserted thereon.

They should be informed that the freeboards were assigned subject to the fore and afters being in accordance with the Regulations. It was reported that these were in one length and Owners have since been informed that these can be accepted provided chocks are fitted on the hatch beams as required. The Owner has been in communication with this Office and he has instructed Mr. Law of Messrs. Ferguson and Law to meet the Surveyor on board.

The Surveyor should see that the fore and afters and their bearing surfaces and chocks on the beams are in accordance with the requirements and should report particulars to this Office.
