

Steel Screw Steamer "KALUA" ex "DACAPO" : No. 73865 in R.B. :
722 tons gross : built at Sunderland in 1908 : classed with
the Bureau Veritas but never classed with this Society.

It is submitted the Grimsby Surveyors be informed
that as the vessel has never been classed with this Society
there are no plans or particulars of the ship in this Office
other than those in the Register Book.

In the first place it will be necessary for plans
to be submitted showing the scantlings and arrangements of
hull, machinery and boilers, together with particulars of
engines, in order that it may be seen for what class the vessel
might be considered eligible.

If there are no plans in the possession of the
Owners it might be possible for them to obtain copies of the
original plans from the Builders, Messrs. John Crown & Sons
Ltd. of Sunderland. Otherwise, it would be necessary
for full particulars to be reported on First Entry Report
forms for the consideration of the Committee, also the
requirements of the Rules for vessels not built under survey
would have to be complied with.

*Per 19/11/24
and 23rd.*
