North Bridge Dry Dock,

HULL.

3rd March, 1920.

Messrs. A. Weir & Co.,  
London.

Dear Sirs,

S.S. "NAIMES".

We have had a survey on the Port Boiler of this vessel and we regret to say the Lloyds Surveyor cannot give this boiler an extension for another six weeks unless the centre furnace is renewed, this is very serious for the ship as it will mean at least 6 weeks to carry out this.

We ourselves think that a temporary repair could be effective with ~~our~~ electric welding process but this Surveyor will not accept it as previous welding to this furnace (not our system) has proved defective. We would suggest Mr. Houston should be here to go into the matter.

Awaiting your instructions.

Yours faithfully,

(Signed) BRIGHAM & COWAN (HULL) LTD.

W. SMITH IRELAND.
