

COPY.

2nd September, 1921.

Dear Robert,

We are now dealing with your freeboard report on the S.S. "KINGHORN".

In your letter you state that the Norske Veritas assignment is 10'-2" from the top of the shelter deck stringer plate at side to the centre of disc; in your report you have given 10'-1", a difference of one inch.

Will you kindly let me know if 10'-2" is the correct assignment by the Norske Veritas, for in that case I think our computation will be the same; that is, the vessel will be entitled to the full Table A loading. An early reply will oblige.

With kind regards,

Yours sincerely,

R. Cheetham, Esq.,

LEITH.
