Recd. 24 APR 1925
LONDON

There are Six Babcock & Wilcox Boilers lying at Kinghorn which have never been installed in vessels.

When manufactured these were tested by your Surveyors on 2/2/1921

- 6/1107 A
- 6/1107 B
- 6/1107 C
- 6/1108 A
- 6/1108 B
- 6/1108 C

These have been lying in the open for some time and the end cases are rusted.

With a view to getting them sold we wrote your Leith Office, in their district, and asked if they could give a report and Mr. David Scott met their Surveyor at Kinghorn yesterday. Talking over the matter with his Chief they 'phoned us this day saying that before they could give a report on them water tests would be necessary. This, however, is quite out of the question as it would mean their fitting together and entail expense.

We were negotiating their sale to South America, for land use, with a view of having an authoritative report on their present condition that we have approached your good selves.

They cannot be sold as new boilers, and your original insurance would not cover them after standing exposed in the open, I am writing you now.

We should be glad of your help and guidance in this matter and it would be a pity to see such good material lost.

Yours very truly,

D. & R. B. Scott
