SURVEYS FOR FREEBOARD.—STEAM SHIPS.Index No. 81351
(For London Office only.)

No 28868

PARTICULARS RELATING TO ALL STEAM SHIPS EITHER FLUSH DECKED, OR WITH
GALLANT FORECASTLES, SHORT POOPS AND BRIDGE HOUSES DISCONNECTED, OR
WITH TOP GALLANT FORECASTLES HAVING LONG POOPS, OR RAISED QUARTER DECKS
CONNECTED WITH BRIDGE HOUSES, OR OTHERWISE.

Port of Survey Sunderland
Date of Survey 22 July 1924
Name of Surveyor G. D. Aitken

NOTE.—If the
depth is measured
when vessel is
afloat, the details
of measurement
should be reported.

Ship's Name.	Port of Registry and Nationality.	Official Number.	Gross Tonnage.	Date of Build.	Particulars of Classification.

Length of Ship	
Corresponding percentage (Para. 11, 12, 18, or 14) { 29.68% }	

FREEBOARD recommended amidships from centre of Disc to top of Statutory Deck Line, Wood (Steel) Deck :—

Fresh Water Line	above centre of Disc
Indian Summer Line	" " "
Winter Line	below "
Winter North Atlantic Line	" "

If the frames, skin planking, or ceiling are of unusual thickness the breadth of vessel to inside of ceiling should be reported if possible.
In vessels obtaining an allowance for deck erections under Para. 11 where the sheer drops abeam amidships the height of R.Q.D. is to be taken from the level of the top of the amidships beam.
In flush-decked vessels the total standard mean sheer means the sheer measured at the stem and stern-post. In vessels having poops and forecastles, it means the sheer measured at points distant one-eighth of the vessel's length from stem and stern-post.

230.10.23. T.

+ State dimensions of freeing port area on back of this form.

The Surveyor should state whether the fall in sheer as reported is measured relatively to the straight line of keel or to the water line. If measured relatively to water line the vessel's draft at time of survey, and also the usual load draft forward and aft should be reported.

MARKING FORM

30 JUNE 1924

Lloyd's Register Foundation

W487-0252

Do all the Frames extend to the top height in the Poop?	yes	Raised Quarter Deck?	✓	Bridge House?	yes	Forecastle?	yes
To what height do the Reverse Frames extend?	channel frames						
Has the Poop or Raised Quarter Deck an efficient Iron Bulkhead at the fore end?	yes						
Give particulars of the means for closing the openings in Bulkhead	Wash boards full height in riveted channels.						
Is the Poop or Raised Quarter Deck connected with the Bridge House?	no	Has the Bridge House an efficient Bulkhead at the fore end?	yes				
Give particulars of the means for closing the openings in Bulkhead	20 openings						
What is the thickness of the Bridge Front plating?	.40	and Coaming plate?	.44				
Give scantlings and spacing of the Stiffeners	9 x 3 1/2 x 46 B.A. 30" apart						
Are bracket plates fitted at each end of the Stiffeners?	lugs	Are hor'l. brackets fitted connecting Bridge Bulk'd. with Bulwarks?	yes				
Has the Bridge House an efficient Iron Bulkhead at the after end?	yes						
How are the openings closed?	Wash boards full height in riveted channels.						
Is the Forecastle at least as high as the main or top-gallant rail?	yes	Has the Forecastle an efficient Iron or Wood Bulk'd. at after end?	yes				
Are the Engine and Boiler openings covered by a Bridge, Poop, Raised Quarter Deck, or enclosed by a Strong Iron or Steel Deckhouse?	bridge						
If the openings are not so protected are the exposed parts of the Casings efficiently constructed?							
Give thickness of plating; scantlings and spacing of Stiffeners							
What is the height of the exposed Casings?		Are suitable means provided for closing all openings in them in bad weather?	yes				
Are the Weather Deck Hatchways efficiently constructed and at least equal to the requirements of Section 28 of the Rules for 1904-5? Give particulars below:	yes
