

AIN
26th May, 1921.

Lloyd's Surveyor,
Ramsden Square,
BARROW-IN-FURNESS.

Dear Sir,

No. 579.

With reference to our letter of 24th instant regarding the Spencer Bonecourt Waste Heat Exhaust Boiler fitted on the above vessel, we now give below, for your information, copy of letter which we have received from the manufacturers, from which it will be observed that no new further part will be required to re-set the existing safety valve from 100 lb. to 120 lb:-

"Replying to your favour of yesterday's date we beg to inform you that the safety valve on the above boiler can be re-set to 120 lb. per square inch without fitting a new spring or any new further part as the valve we supplied is our standard 100/120 lb. per square inch fitting".

Yours faithfully,

FOR VICKERS LIMITED

DIRECTOR.
