

16th July 1907

Dear Mr. Nicol

Your letter to have a portable means of closing opening at after end of bridge in the stream Morawitz. The complete particulars should have been given on the marking form, as anyone reading the same would understand the sub+ocean bolts pass through the bulkhead plating all round the opening instead of sides only.

However your letter makes it clear and I have noted full particulars on report for future reference. In the case then

arrangement is satisfactory the after end of the bridge it would not do for fore end.

With Kind

Yours Faithfully

Geo. H. ...
