Casualty 24th January, 1936

Particulars of Casualty

This vessel was reported in distress & on fire in lat. 36 N, long. 133 E, on the 24th January, 1936.

It was later reported that she had been abandoned by her crew on the 25th January, & subsequently drifted ashore at the north-west end of Dogo (Oki) Island, with her port side split amidships; starboard side badly buckled and back broken.

Lloyd's Agent per Salvage Association stated on the 29th January that he considered nothing left was worth salvaging, even if possible.

In reply to a casualty notice the Owners state as follows:- "Whilst it would now appear definite that this vessel has in fact become a total loss, it is nevertheless a little premature for us to authorize that she be expunged from the Register Book."

5th March, 1936.

Upon inquiry at Lloyd's today (4th March) it was stated that the Underwriters had accepted this vessel as a total loss & all claims paid.

A further letter, dated 2nd March, has been received from the Owners intimating that the vessel's name may now be omitted from the Register Book.
