

W 496 - 0073

S.S. "ANGLO-COLUMBIAN" ex "SCHWARZENFELS"

-----

The length of this ex-German steamer as indicated on the plans was 476.7', as in the case of the similar vessels "TREDENHAM" and "WEISSENFELS", but the length given on the First Entry Report is 479'.

This involves an increase in the second number from 46597 to 46836, and a change in the grades of Table 18, for topsides.

In view of the general scantlings, the Newport Surveyors were informed that the class ultimately to be assigned would be 100A1 "With Freeboard", and in view of this restricted class it is submitted that no additional strengthening need be provided on account of the slight increase in length.
