

NEW YORK

APRIL 25th, 1936.

RETAIN

E. G. HOUSE

the Owners' Representative survey the Steel Screw Steamer
"NUNORLEANS" (British) 4418 tons gross, for freeboard, and,
in my opinion, this vessel may proceed upon a voyage to the
United Kingdom with a freeboard of 3' 2" from top of the steel
upper deck at side until an official freeboard can be assigned
by the British Government.

A disc corresponding to the above freeboard has been
painted upon the vessel's sides.
