

Ex-German Steamer "SONNENFELS"

It is submitted Messrs. Thos. Law & Co., should be informed that the whole of the requirements of Special Survey No. 1 have been carried out at Cardiff excepting the testing of double bottom tanks, peak tanks, and tween deck ballast tanks, also internal examination of double bottom.

It is expected that the double bottom tanks and the internal examination of dry tank under boilers will be carried out before the vessel sails.

The remaining portion, namely, the testing of the peak tanks, tween deck tanks, and internal examination of double bottom ballast tanks to complete this Survey could be carried out on the vessel's return, when the case, on the payment of fees, could be considered for Classification.

To complete the L.M.C. the main and donkey ^{the} boilers are to test under steam, and / safety valves adjusted, but this will most probably be done before the vessel sails.
