

August 21st. 1918.

Messrs Sir Raylton Dixon & Co. Ltd.
Middlesbrough.

Dear Sirs,

S.S. "VALEMORE" No. 610.

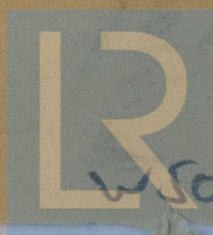

We are in receipt of your favour of yesterday's date
with regard to the non-fitting of the Downton pump on the above
steamer. When this pump was eliminated from the specification
of the D.C.A.S. we were of the opinion that Lloyds did not
require same to be fitted. However, we have no objection to
fitting the Downton pump upon the termination of the War if
requested to do so by Lloyds Committee.

Yours faithfully,

For Funness Withy & Co. Ltd.

(Signed) D. Ross

Constructional Superintendent.
