

480
Messrs Swan, Hunter & W. Richardson's No 1010
Dimensions 480 x 61 x 35'-9" mld
Building at Ferrol. To class 100A.1. Shade deck

It is submitted Messrs Swan, Hunter & W. Richardson be informed that as they have applied to this Society for freeboard assignment and the vessel is building at Ferrol under the Society's survey, the outline plans showing the watertight sub-division, and positions of side lights, scuppers, soil pipes and other openings through the vessel's sides as described in the Committee's circular 1285, should be forwarded to this office.

The Committee could deal with the flooding calculations, but as in this case the Builders have arranged to submit plans and particulars to the Board of Trade, with a view to meeting their requirements for Passenger steamers, it is not necessary (to also) submit the flooding calculations to this Society. The Committee will be prepared to accept the load line provisionally approved by the Board of Trade for the watertight sub-division.

It should be pointed out that it will be necessary for the Society's Surveyor to check the drawings used in the calculations for determining the load line.
