Swan, Hunter & Wigham Richardsons No 1010

It is submitted the Surveyors should be formed that with the position of sill of lowest side light given by the Builders viz 10 feet below the wood upper deck at side the freeboard for all seasons would be 10 ft. 7½ ins from statutory deck line 1½ ins above the wood upper deck at side.

As regards the Builders request for the freeboards required for the vessel without the side lights below the main deck, the Surveyor should be requested to forward a small outline profile sketch showing in figured dimensions the position and extent of the openings in the shade deck sides, and of the enclosed portions between the upper and shade decks.
