

REPORT on the *ss* Adolph Woermann

The Surveyor should be requested to forward the usual application form Reg 9

It should be pointed out that if the freeing port-area is not made equal to the rule requirements the freeboard regulations require the freeboard to be increased by the addition of one per cent of the moulded depth, viz  $3\frac{1}{2}$  inches in this case, making the freeboard 6 ft 3 ins instead of 5 ft 11 $\frac{1}{2}$  ins as conditionally assigned.
