

NEW YORK

APRIL 21st, 1936.

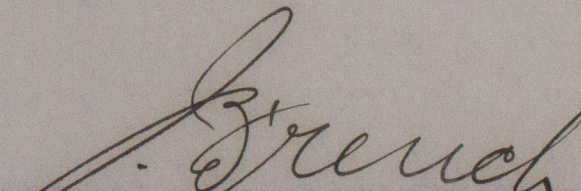

J. W. BELTON

the Owners attend on board the Steel Screw Steamer "COLUMBIA"  
24,578 tons gross register of New York to survey the vessel for  
condition and freeboard for voyage to the United Kingdom.

This vessel is in safe condition for the voyage and the  
following freeboards are marked on the vessel's sides and verified:-

Centre of disc below top of steel deck. . . . .	11' 6 "
Tropical Fresh above centre of disc.....	1' 7½"
Fresh above centre of disc. . . . .	9½"
Tropical above centre of disc . . . . .	9½"
Winter below centre of disc . . . . .	9½"
Winter North Atlantic below centre of disc. . . . .	- - - -

In my opinion, the vessel may proceed on her intended  
voyage under the above freeboards.

  
Chief Surveyor to Lloyd's Register of Shipping.
