

Twin Screw Motor Ship "CABO SANTO TOME"

The First Entry Reports on this vessel are being laid before the Classing Committee today, with a view to the class +100A1 "With freeboard" being assigned. It would appear that all matters are in order, but the fees for Special Survey during construction of hull and machinery do not appear to have yet been paid, and, in these circumstances, it is submitted for consideration whether the Marseilles Surveyors should be authorised to issue Certificate "F" as desired.
