

S.S. "MELITA" & "MINNEDOSA", built in 1918 by Messrs. Barclay Curle & Co. Ltd., and owned by the Canadian Pacific Steamships Ltd.

It is submitted Dr. Montgomerie be informed that the Steamer "MINNEDOSA" is reported to have left St. John, N.B. on the 10th instant for Antwerp. She cannot therefore be under repair at Liverpool as mentioned, although it may be possibly intended to send her there subsequently.

The Reports of these vessels in this Office have been examined, but there is nothing to show that the Owners have at any time discussed with the Society the question of working at the ends of the superstructures and in the superstructures themselves, and nothing is known of such a question having been raised.
