

FRENCH FREEBOARDS FOR TANKERS. - S.S. "MYRIAM".

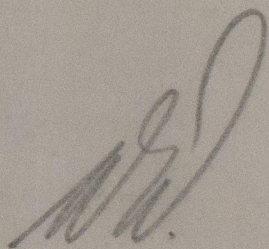

It is submitted the Rouen Surveyor be informed that the French Tanker freeboards are required for the above vessel which is presently laid up at that port.

A few copies of the new Convention Report Forms C11 should be sent, and the Surveyor should be instructed to report full particulars on one of these forms and forward it as early as possible to this Office, in order that the amended freeboards may be computed and any conditions of assignment may be intimated.

They should be advised that the Owners are taking steps to supply the information required for the coefficient of fineness.

A copy of the original freeboard report and a copy of the International Convention 1930 report should be sent for the Surveyor's guidance.

The Paris Office should be advised as above, and also informed that it is noted the Owners will advise later when the steamer "NAUSICAA" will be ready for survey.

24.4.31.
