

S.S. "AGNES DUNCAN" & "ETHEL DUNCAN".

It is submitted the Owners of the SS. "AGNES DUNCAN" and "ETHEL DUNCAN" should be informed by letter that provided the compartments of the double bottom and fore and after peak tanks in these vessels are kept full of fuel oil when at sea, it is considered the structural strength of these compartments and spaces is adequate for the purpose of carrying such a cargo. When, however, fuel oil is carried in any compartment which is adjacent to a compartment in which is carried cargo that would be liable to damage by contact with oil leakage, provision must be made in accordance with paragraph 5 Section 49 of the Rules.
