

Steel Sc. "EARL OF DURHAM" (ex "JOLLY CHRISTINE" ex "TINE"),  
No. 20536 in Register Book, 313 tons gross, built at Slidrecht  
in 1918, and never classed with this Society.

Dimensions:- 125.7' x 21.5' x 10.1'

Owners:- Messrs. Charlton & Co.Ltd.  
-----

It is submitted the Grimsby Surveyors should be  
informed that, in the first instance, sketches of midship  
section, and profile, <sup>decks</sup> showing the scantlings and arrangements  
of the vessel, together with boiler plan, plan of pumping  
arrangements, and particulars of cylinders, shafting &c.,  
<sup>if possible</sup> should be forwarded for the consideration of the Committee,  
with a view to its being ascertained for what class the vessel  
could be considered eligible.

Provided the scantlings of the hull and machinery, &c.,  
are found satisfactory, it will be necessary for the  
requirements of the Rules for Vessels not built under Survey  
to be complied with, and for the vessel to be found or placed  
in thoroughly good and efficient condition to the Society's  
satisfaction.
